With the Wireless Connecting Utility, you can make the Transfer of: 1.Images to digital camera, 2.Camera to PC and 3.Images and PC to folder /web site.Download the Wired ("dn") series from the Nikon website([www.nikonusa.com](http://www.nikonusa.com)) on the night you intend to use it and install it on your computer. The following steps will apply if you use your host (PC) running Windows 98/2000/NT or higher. If you use your host running OS X (Macintosh) or a host running Linux, click here:

---

Wireless Connecting Utility for Mac and Linux. (Please note that the instructions are for the Wireless Connecting Utility to work on Mac and Linux. The instructions for wireless transferring with other Nikon digital cameras cannot be executed).

1. Open the Wireless Connecting Utility using the start menu.
2. Click on "Enable" on the Wireless Connecting Utility, select "Save Settings".
3. Select the wireless camera you want to use and click the button to send an inquiry for its host.
4. Choose what you want to do to transfer your images. You can

---

transfer the images to the host, to a folder on the host, or both.

[img] 5. When you have finished with the transfer, close the Wireless Connecting Utility and choose to "remove" the camera from the host. Whenever you want to pair your wireless camera with your host, open the Wireless Connecting Utility by clicking on its icon.

1. Select the wireless camera you want to use and click the button to send an inquiry for its host.
2. Select one of the following options to start the transfer process.
  - a. Select "Transfer to my PC" to allow the images to be transferred to

---

your host computer. b. Select "Move to my PC" to allow the images to be moved to a folder on your host. Note: you can select "Move to my PC" and then click the "More Settings" button to transfer the images to the same folder you were transferring to. Note: you can also transfer the images to a folder on the PC or a directory on the web. To transfer the images to a folder or directory on the host, choose "Transfer to my PC". Tip: Make sure the communication mode is set to "Auto - Low Speed" to transfer quickly. To move the images to

---

a folder on your PC, simply click "Transfer to my PC" to

What's New in the?
